Filled with wonderful examples of how natural light can transform space. Unfortunately there is little technical discussion that deals with the theory of day-lighting and other uses of light. Very little has been written about the use of light in Architecture, so this is a welcome "coffee table" book that might get more designers interested in ...

Amazon.com: Customer reviews: Architecture of Natural Light

To ensure even light, Boulder, Colorado, architect E.J. Meade places light sources as high up as possible; higher light reaches deeper into interior spaces. He extends windows to the ceiling to bounce light around the room. Light shelves—soffits that project into the room from beneath high windows—also reflect sunlight off the ceiling.
