Natural selection is one of the basic mechanisms of evolution, along with mutation, migration, and genetic drift. Darwin's grand idea of evolution by natural selection is relatively simple but often misunderstood. To see how it works, imagine a population of beetles: There is variation in traits. For example, some beetles are green and some are [...]

The days of repeated pesticide applications inside your home are long gone. At ScherZinger, we think it's smarter to keep the bugs out versus battling them once they're inside. Our Guardian Program does just that. Not only does it guard your home, but it attacks and repels bugs outside before they have a chance to invade. Learn More
