It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

Bell 205 Flight

Bell designed its Model 204 in response to a 1955 United States Army requirement for a utility helicopter. The 204 was a giant step forward in helicopter design, being one of the first to be powered by a turboshaft. The turboshaft engine radically improved the practicality of the helicopter due to its light weight and high power-to-weight ratio, lower fuel consumption, and lower maintenance and ...

Bell 204/205 - Wikipedia

In 1941, Bell hired Arthur M. Young, a talented inventor, to provide expertise for helicopter research and development. It was the foundation for what Bell hoped would be a broader economic base for his company that was not dependent on government contracts. The Bell 30 was their first full-size helicopter (first flight December 29, 1942) and the Bell 47 became the first helicopter in the world ...
