“CGI” stands for “Common Gateway Interface.” CGI is one method by which a web server can obtain data from (or send data to) databases, documents, and other programs, and present that data to viewers via the web. More simply, a CGI is a program intended to be run on the web. A CGI program can be written in any programming language, but Perl

CGI PROGRAMMING 101

CGI programs are capable of sending many kinds of media, such as documents, images, and audio clips. Most Web sites with fields for input use CGI, and a great deal of the dynamic content on the Web is done using CGI. The possibilities are limitless, but a CGI program needs to be
