Author: Healthcare Counselling and Psychotherapy Journal I recently enjoyed reading 'Counselling the Person Beyond The Alcohol Problem' which I found informative and useful. I liked in particular the discussion/rationale of offering specialist knowledge in context as opposed to a sense of being an expert on your client.

Why Client-Centered Therapy Works. Client-centered therapy works because it focuses on what the client needs [3]. If a client needs to discuss the past, the therapist will listen and respond in an empathic manner. This approach assumes that the past issue is impeding the individual's ability to deal with the present.

The psychodynamic school The term psychodynamic refers to the transfer of psychic or mental energy between the different structures and levels of consciousness within people's minds.

## **Introducing Counselling and Therapy Approaches**

Too often in this day and age people are in a hurry to "get to the point" and rush to a solution. The intake process helps the therapist slow down the client, assists both the counselor and the client with obtaining a clear focus on past and present concerns, and it informs the counselor as to the direction to take in the counseling process.

### **Therapy for Military and Veterans Issues**

The counsellor's role is to be a patient listener and encourage the person to talk about the loss including past and present memories of the deceased. Bringing the client to a greater sense of clear awareness that the death has occurred can be achieved through such questions as "how did the funeral go?" "Where were you when you heard?"
