In game theory, a solution concept is a formal rule for predicting how a game will be played. These predictions are called "solutions", and describe which strategies will be adopted by players and, therefore, the result of the game. The most commonly used solution concepts are equilibrium concepts, most famously Nash equilibrium.. Many solution concepts, for many games, will result in more ...

Although game theory has been applied to many fields, Fudenberg and Tirole focus on the kinds of game theory that have been most useful in the study of economic problems. They also include some applications to political science. Game Theory can be used for a first or second course. It presents subgame perfection and Bayesian games with a minimum of detail with technical subtleties included in the advanced sections and uses markers to indicate the suitability of various sections to different ...
