Herein, we present the scale up development of an innovative synthetic process to pregabalin. The process is underpinned by two enabling technologies critical to its success; continuous chemistry allowed a safe and clean production of nitroalkene, and asymmetric organocatalysis gave access to the chiral intermediate in an enantioenriched form. Crucial to the success of the process was the ...

Asymmetric Organocatalysis and Continuous Chemistry for an ...

Siemens & Halske was founded by Werner von Siemens and Johann Georg Halske on 1 October 1847. Based on the telegraph, their invention used a needle to point to the sequence of letters, instead of using Morse code. The company, then called Telegraphen-Bauanstalt von Siemens & Halske, opened its first workshop on 12 October.. In 1848, the company built the first long-distance telegraph line in ...

Siemens - Wikipedia

The identified IRED was improved in several rounds of enzyme engineering that ultimately led to a variant showing ~100-fold improvement of conversion at the targeted 100 g·L⁻¹ substrate concentration. The process was scaled to 230 kg, giving the target product in >92% conversion and 73% yield at a diastereomeric ratio of >99.5.

2 Early enzymology-demystifying life. In 1833, diastase (a mixture of amylases) was the first enzyme to be discovered, 2 quickly followed by other hydrolytic enzymes such as pepsin and invertase, 3 but the term enzyme was only coined in 1877 by Wilhelm Kühne. 4 The concept of catalysts, chemicals facilitating a reaction without undergoing any change themselves, was introduced in 1836 5 by ...
